

A survey was sent to the regions and provinces in the past to track and trace the coaches who were trained by the Association.

The survey intends to achieve the following:

1. Gain understanding of the work (coaching) environment of the coaches in the country.
2. Tap in their experiences to influence the current coaching content and methodology.
3. Assist the Coaching Education Department to identify any coaching gaps, the efficacy of the curriculum and design the relevant intervention
4. Provide further workplace support where the need arises.
5. Invite the coaches for further training in line with the various Memoranda of Understanding the Association has with various MAs and partners
6. Establish an engaged community of coaches

While we received appreciable responses, it has been realised that a large number of coaches did not respond to the survey. As a result, we have many coaches who are not accounted for and this raises serious concerns about the continued training of coaches without having a clear record of their work and its impact in the development of the game in South Africa in line with the goal of Vision 2022.

Once again, coaches are requested to complete the survey (Include certified copy of coaching certificate & ID Copy) and send back to Coaching Education Department Email [joy.moloi@safa.net](mailto:joy.moloi@safa.net)/[frans.mogashoa@safa.net](mailto:frans.mogashoa@safa.net) by 31 May 2021.
